

## Project Date & Location

 April 2021

 Chiddingfold, Surrey

## Specification

- ◆ 100 linear metres of aluminium half round guttering and downpipes
- ◆ A new build property inspired by tradition that required an authentic look
- ◆ An alternative product to cast iron which was light weight and easy to install

## Solution

Alutec Evolve half round aluminium gutters with 63 mm Tudor downpipes in Heritage Textured Black

## Description

The Evolve Half Round aluminium gutter system combines the longevity and low maintenance of marine grade aluminium with the ease and speed of installation of plastic gutter systems

The builder commented on the fact that the gutter fittings had gaskets, which just clip together, with no need for bolts or pop rivets, would help save both time and money

## Contractor

C Curtis Building

Supplied by the team at Gutter Centre on a 10-working day lead-time
