

GC RW Aluminium & Cast Iron Colours

One of the beauties of our metal rainwater & roofline systems is the variety of colours available, thanks to our in-house powder coating & wet-paint facilities.

Polyester powder coating produces attractive aluminium rainwater and roofline products that add value to any project and save time, money, and hassle. Aluminium products can be supplied with a matt, satin, gloss, or leatherette finish in any RAL colour.

We offer nineteen standard colours for aluminium and nine for cast iron.
